

Project Overview

MCP Environmental supported Pennaf Housing Group with a community project that will benefit local residents.

The social landlord provides more than 5,400 homes across six counties and asked for help refurbishing Mold Cricket Club in Flintshire, Wales.

MCP rose to the challenge, donating an asbestos refurbishment survey to ensure any asbestos materials were identified prior to improvements been made including replacing the soffits and wall coverings.

MCP Environmental - Asbestos Surveying Operations Manager, Shaun Dennison said: “We always try to support community projects whenever possible, building on our expertise working for social housing providers across the UK. We are passionate about sports at MCP and wanted to help Pennaf Housing Group and Mold Cricket Club.”

Client Review

“We are delighted that MCP Environmental rose to the challenge to provide a free asbestos refurbishment survey, helping Mold Cricket Club and the wider community facilitate the improvements programme.”
